*The Way to Better Concrete*

## Floor Surface Treatments

# CALRES 120

The protection of industrial concrete floors where the prevention of dusting, sealing against occasional oil and grease spillages, and an easily cleaned surface is required.

Recommended for light industrial use in low traffic areas.

**EFFECTS:**

A clear semi-glaze impregnation which dissolves most types of efflorescence and enhances the natural colour of the concrete. Dust proofs the floor and seals the surface against staining from mild spillages.

For heavy duty or high wear, exterior applications, or for coloured applications, we recommend you specify and use **CEMENTAID LB9**, or **CEMENTAID ROKITE**.

**NOTE:**

**CEMENTAID "CALRES 120"** is an acrylic resin in a penetrating solvent, and does NOT contain any silicone resins.

**WHERE  
RECOMMENDED:**

All concrete surfaces subject to dusting, where light industrial traffic or wear, or where occasional oil and grease spills are expected.

**FOR APPLICATION  
SERVICE:**

Contact your local **CEMENTAID** representative.

## SPECIFICATIONS

All surfaces to be thoroughly dry and free of all oil or grease. Brush down to remove all surface dust and loose matter. Apply one or two coats of **CEMENTAID "CALRES 120"**, depending on the porosity of the floor, at the rate of 4-5m<sup>2</sup>/l.

**CEMENTAID "CALRES 120"** is best applied by brush, roller or knapsack spray. Equipment should be cleaned with solvent based thinners such as Xylol.

INDUSTRIAL FLOOR SPECIFICATIONS - GEL CONTROL AGENT - ANTI-CORROSION  
IMPREGNATIONS - OIL & SOLVENT PROOFING - WATERPROOFING - RAPID HARDENING  
RETARDING - SURFACE TOUGHENING - MORTAR AND DAMPCOURSE ADMIXTURES, ETC.
