## **CALFORM CREAM**

**To Prime and Preserve Treated Timber and Pressed Wood forms for Architectural Concrete**

**EFFECTS:** Calform Cream penetrates deep into new form work, to protect against wet / dry cycling and prevent distortion of forms. Calform Cream resists the transfer of splinters into concrete from sawn forms.

**WHERE RECOMMENDED:** On all new forms of smooth timber, sawn timber, pressed wood sheets and any porous material to be used for concrete forming.

**NOTES:** Calform Cream is a form primer. After initial treatment, normal form release agent Calform NX may be used for long form life and high quality strip.

### **SPECIFICATIONS**

All forms shall be primed several days before use with a liberal application of Calform Cream. Before forming, all surplus Calform Cream is to be removed.
